**To:** Baggett, Steve  
**Subject:** RE: ISS Pilot Test Permits  
**Attachments:** COE Nationwide Permit Letter.doc

Steve:

Based upon information I received from your JPP meeting a couple of weeks ago, I've drafted the attached letter in support of the Nationwide Permit you will be applying for with the Corps of Engineers for the ISS Pilot Study at the Amtrak site.

I haven't been able to get anyone to tell me who to address this to ? Do you have a contact at the Corps yet that I should address this to ?

Let me know if the letter looks good to you, and once I find out who to address it to, I can finish it up.

John

**Subject:** ISS Pilot Test Work Plan (DE-0266)

Hello John,

In follow-up to our June 8 meeting and as proposed in Stantec's April 14, 2015 letter (prepared in response to your March 17, 2015 letter), attached is the Work Plan for In-Situ Stabilization Pilot Testing at the Amtrak Former Fueling Facility, Wilmington, DE (DE-0266). Hard copies are being sent to DNREC and EPA.

Please let me know if you have any questions.

Steve

**Subject:** Meeting Summary and Sign In - June 8, 2015 meeting

All:

Attached is a meeting summary and the sign in sheet from Monday's meeting.

I am in the process of reviewing the site files to determine whether any additional parameters will need to be assessed further for compliance with HSCA. It will likely be next week before I issue a letter with DNREC's opinion.

DNREC and EPA appreciate being able to meet in person to discuss the project. I believe that we are all on the same basic page now, and that we will move forward successfully.

Please let me know if you have any questions or comments.
